ADVANCED MEDICAL IMAGING: MAMMOGRAPHY PRACTICE

MODULES AVAILABLE

/ Fundamentals of Mammography Practice
/ Advanced Techniques in Mammography Practice

KEY FACTS

The Fundamentals of Mammography Practice (FMP) and Advanced Techniques in Mammography Practice (ATMP) Modules form a 60 credit Post Graduate Certificate in Advanced Medical Imaging and offers training led by multi-disciplinary educators in the mammography field. You will develop a high level of expertise in mammography technique and your personal development and standards of professional practice will be enhanced. An approach to clinical practice will be developed that is critically reflective and evidence-based and you will become autonomous and active members of your clinical multidisciplinary team.

OUR TEAM

Our team consists of a broad range of expert individuals and external professionals who hold honorary appointments with the University of Salford.

Additional support from expert clinical colleagues from supporting fields including; Pathologists, Oncologists, Breast Surgeons and Tissue Viability experts will provide you with a structured support mechanism throughout your training.

Full details: www.salford.ac.uk/health-and-society
INDEPENDENT LEARNING

You are expected to develop skills in independent learning. Due to the highly specialist nature of this area of practice, we support you to develop a self-directed approach to your studies and develop the expertise within your clinical department.

COURSE FEES

The course fees include all tuition and assessment fees, virtual and actual access to all the library facilities, including our on-line virtual learning environment “Blackboard”, and one re-assessment if required.

Single module (30 credits) / £1,590

Taken as part of a full pathway:
PgCert in Advanced Medical Imaging Mammography Practice (60 credits) / £3,180

APPLICATION PROCESS

Applicants must apply for registration to the University in the following steps. If you are taking this as a single module only please skip step 1.

Step 1 - Registration

/ All applicants must register with the University www.salford.ac.uk/apply-postgraduate

/ On the online application form:
/ Select Postgraduate Certificate
/ Select Course Name: Postgraduate Certificate in Advanced Medical Imaging
/ Within My documents, Miscellaneous Documents add a word document entitled Module Selection/Supporting Statement. Within this document clearly state the module/s that you wish to apply for and the specialism.
/ For example: I wish to apply for Fundamentals of Mammography Practice and Advanced Techniques in Mammography Practice, my specialism is mammography. I currently am employed 3 days a week in an NHS Breast Unit where my mammography clinical experience will be supported.

Step 2 - Confirmation of Funding

You must provide a purchase order number for the total amount of your module to our course administrator Barbara Henning on b.a.henning@salford.ac.uk

Step 3 - Verification of Clinical Requirements

You are required to complete a Verification of Clinical Requirements form to show that you have the relevant support on placement. This is located within www.salford.ac.uk/course-finder, Postgraduate Taught, Advanced Medical Imaging, Entry Requirements. Return this to Barbara Henning on b.a.henning@salford.ac.uk

SINGLE MODULE ENTRY: If you are taking this as a single module and not part of a Postgraduate Certificate / Diploma or Masters or are self funding then from www.salford.ac.uk/advanced-medical-imaging
/ Select ‘Applying’ down the left hand tab
/ Select ‘Applying for a taught course’
/ Select ‘Post Qualifying Health and Social Care Single Modules’
/ Select ‘Level 7 Masters Application Form’
/ Within your Personal Statement please ensure to state the module you wish to apply for Extending Advanced Practice and your specialism for example
